

Microblading After Care

Entire healing process will take from 4-7 weeks depending on your body regeneration and age. Your new eyebrows will go through several phases during the healing cycle. Itching and flaking may appear during the first seven days post-microblading procedure. Experience has shown that by following the after-care instructions these symptoms may quickly disappear.

Microblading post-care is very important to the appearance and longevity of your new eyebrows. Do not let brows get saturated from showering with water or use lotion, soap, and/or use makeup on your eyebrows for 7-10 days after your procedure. Only use products as given to you as instructed below.

Aftercare for next 5-10 days: Clean hands prior to touching brows. Use Wipes (in aftercare kit) first day beginning first hour and every 1-2 hours to remove lymphatic drainage. Please use wipes as instructed, then use once daily till gone and after that use warm water to wipe clean. Then apply light amount of Ointment 1-2x daily "OR" **If Oily use only 1x daily or as instructed at time of service.** You may use pressure when wiping but don't use friction rubbing.

Otherwise you may prefer Post-care sterile dressings (Liquid bandage cream) as or when necessary and/or Antibiotic ointment can be applied once daily when needed. *All to be used sparingly.*

When cleansing your face avoid treated Eyebrow area with other cleansers. During the shower, keep your face away from the showerhead or take a bath. Never use friction while cleaning treated area as it will disturb the skin from natural healing. Please continue post care 7-10 days.

The following you must **AVOID** during next 14 days *post-microblading procedure*:

- Increased sweating
- Practicing sports
- Swimming
- Hot sauna, hot bath, or Jacuzzi
- Sun tanning or salon tanning
- UV/UVA Rays or chemicals as they have been known to cause a shift in color, premature fading and/or Blood poisoning from sun exposure.
- Picking, peeling, or scratching of the micro pigmented area in order to avoid scarring of the area or removal of the pigment
- Performing tasks related to heavy household cleaning such as garage or basement cleaning where there is a lot of airborne debris
- Driving in open air vehicles such as convertibles, boats, bicycles, or motorcycles

Enjoy Your new LOOK!!!

Complimentary appointment should be 7-8 weeks from date of service today.

Please call 2 weeks prior for booking you Complimentary Perfecting Service

What to Expect During and After Your Microblading Session

Immediately after the procedure the area treated will look much darker and much more defined (as if it were "painted on"). The swelling diminishes (24-48 hours) and your Brows will become more evenly shaped. Be prepared for the color to be significantly lighter and the overall appearance much softer and more greyish after the healing occurs. It will take time for this transition, based on how quickly the outer layer of your skin exfoliates (sluffing/peeling outer layers). Usually the exfoliation process occurs about 4 to 7 days and will be complete at about day 10 Days. Color variations depend on darkness of your color.

This might give you the impression that color is fading too quickly. Often even with proper care, clients may lose some of the Microblading, which make brows look uneven. This is very normal and the reason why most customers need a perfecting service after 7-9 weeks.

Once the healing of the skin starts taking place, it will look like dandruff flakes or dry skin. However, this is just superficial color and dry skin being naturally removed from your eyebrows. The final look of your eyebrows will be apparent approximately 30 days after your procedure. You may want to apply Vaseline for a while.

When brows are completely healed, always apply a layer of sunscreen SPF 30 up to SPF 50 on your eyebrows when exposed to the sun. Sun exposure might cause the color pigment to fade away more quickly. When using foundation, be aware when applying to avoid your healed eyebrows. If foundation is applied over healed brows, your eyebrows will appear lighter.

You may text anytime if you have further questions or may not be sure that the instructions were clear.

If you have any unexpected problems with the healing of the skin, please contact Velvet Touch Permanent Cosmetics immediately, to discuss further instructions. Or **Contact and consult physician if any signs or symptoms develop such as the following: fever, redness at the site, swelling, tenderness of the procedure site, elevated body temperature, red streaks going from the procedure site towards the heart, and/or any green/yellow discharge.** May report any adverse reaction to the Texas Department of State Health Services at 888-839-6676.
